SUMANT

Java Full Stack Developer | Computer Science Student

tiwarysumant4@gmail.com | Portfolio | LinkedIn | GitHub | LeetCode

SUMMARY

Final-year Computer Science student and **Java full stack developer** building web applications with **Spring Boot, React, Node.js**, MySQL and MongoDB. Built and deployed four live projects, including an e-commerce platform with JWT authentication and role-based access, and a machine-learning QR-code phishing detector. Seeking entry-level Java Developer and full stack roles.

EDUCATION

Bachelor of Engineering - Computer Science, Chandigarh University 2023 - 2027
Coursework: Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, Linux, Artificial Intelligence

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python, C++, C
Backend: Spring Boot, Node.js, Express.js, REST APIs
Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS
Databases: MySQL, MongoDB, Supabase (PostgreSQL)
AI / ML: Python, scikit-learn, XGBoost, LightGBM, FastAPI, Pandas, NumPy, OpenCV, Flask, PIL
Tools: Git, GitHub, Docker, VS Code, Maven, GitHub Actions, Netlify, Render, Agile/Scrum
Testing & QA: Postman (REST API testing), JUnit (basic), QR-code detection testing, Manual & Functional Testing
Gen AI: Azure OpenAI, Prompt Engineering (basics)

PROJECTS

AEQDF - Quishing Detection System | React, Node.js, FastAPI, scikit-learn, XGBoost, MongoDB Live Demo | GitHub

- Built and deployed a web system that scans QR codes or takes a direct URL and classifies it **Safe or Malicious** with a risk score and feature-based explanations of each prediction.
- ML service in Python (FastAPI, scikit-learn, XGBoost, LightGBM); Node.js/Express backend with user authentication and scan history on MongoDB Atlas; React + Vite frontend. Deployed on Netlify and Render.
- **QR testing:** ran QR codes through the detector and checked verdicts and risk scores against expected results (for example, python.org returned Safe with a risk score of 16.1).

ShopEasy - Full Stack E-Commerce Platform | React.js, Spring Boot, MySQL, REST API Live Demo | GitHub

- Built end-to-end e-commerce platform with React.js frontend and Spring Boot (Java) REST API backend with MySQL database.
- Validated REST API endpoints using Postman; tested JWT authentication flows, role-based access and order management edge cases.
- Designed RESTful API endpoints with Spring MVC, integrated with React state management for seamless real-time UI updates.

Trello Clone - Task Management App | Next.js, React, TypeScript, Clerk, Supabase, Netlify Live Demo | GitHub

- Built a full-stack Trello-inspired task management app with boards, lists, task cards and drag-and-drop kanban, using Next.js, React and TypeScript.
- Implemented user authentication with Clerk; integrated Supabase (PostgreSQL) for persistent storage and real-time data synchronization.
- Deployed on Netlify; conducted functional & regression testing of drag-and-drop and real-time sync features across browsers.

Emotion Recognition System | Python, OpenCV, Flask, PIL, Deep Learning GitHub

- Trained real-time emotion recognition model on 10,000+ facial images achieving 95% precision in facial feature detection.
- Deployed live video stream detection at 30 FPS with sub-100ms latency via Flask; improved model accuracy by 20% through diverse dataset training.

Velora - E-Commerce Web App | HTML5, JavaScript, Tailwind CSS Live Demo | GitHub

- Developed fully responsive storefront with product listings, shopping cart, and mobile-first UI using Tailwind CSS.
- Implemented dynamic DOM manipulation with vanilla JavaScript for real-time cart updates and interactive product filtering.

ACHIEVEMENTS & CERTIFICATIONS

- Participated in Samsung Innovation Campus Hackathon; participated in Google Big Code 2026 (competitive programming)
- LeetCode contest rating: 1,463
- **Certifications:** Complete Database & SQL (Infosys Springboard); Machine Learning Foundations (LinkedIn Learning); Azure OpenAI: Generative AI Models (LinkedIn); Cloud Computing (NPTEL); JavaScript (Coursera)
